What futures could all this create?

5 scenarios for the future

TIME TO VOTE!!!

COLLAPSE

The brutal end of the thermo-industrial civilization leads to the disappearance of a part of the world population and a major societal regression. Several will be necessary for a new civilization to emerge from chaos.

TRANSHUMANISM

Our actions avoid a civilizational collapse, but the unreasoned use of technology leads to a dystopia that entrains humanity into centuries of alienation within a world controlled by a minority.

NEOHUMANISM

A collective awakening combined with scientific and societal advances allows the transition to a model of humanist society. However, the transition is partial, and some of the problems of the old world remain.

UTOPIA

The joint use of human development and technological progress leads to an ecological, learning, emancipated society, respectful of living beings, founded on self-esteem, the esteem of others, and nature.

TRANSCENDENCE

An extraordinary rise in consciousness leads to an unprecedented collective awakening and a transfiguration of reality through the use of creative thought. Humanity enters an era without limits.

How do we build a world we actually want to live in by 2040?

Some actions you can take

TIME TO VOTE!!!

1 Reduce energy consumption	2 Promote ecological transportation	3 Vote for something different	4 Promote open source innovations
5 Get involved in the nonprofit sector	6 Support neighborhood initiatives	7 Become a mentor, a teacher or a coach	8 Promote equal opportunity
9 Volunteer in a NGO project abroad	10 Engage in lifelong learning	11 Invest personnally in CSR projects	12 Start an association or a philantropy
13 Finance or shelter immigrants	14 Get involved in local politics	15 Promote internally CSR topics	16 Integrate CSR into the business model

Conclusion
